Office Action Summary

Art Unit: 3764

DETAILED ACTION

Claim Rejections - 35 U.S.C. § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 6-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Goble '957.

Goble '957 discloses in figures 1-3 a device for reinforcing a tunnel to prevent migration of a suture through bone comprising an eyelet 10, having a channel 20, threads 25 on the body of the eyelet, a flared head 12 and an expandable member 11.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686

Art Unit: 3764

F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619

(CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-5 and 12-21 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent No. 5,860,978. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims recited in the present invention are similar in scope and subject matter to the claims recited in U.S. Patent No. 5,860,978.

5. Claims 6-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,302,886. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims recited in the present invention are similar in scope and subject matter to the claims recited in U.S. Patent No. 6,302,886.

Art Unit: 3764

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Goble '293 and Goble '255 each discloses a device for attaching a suture. Although each of these references is pertinent prior art, neither was used to reject any claims, in the first office action.
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Brown whose telephone number is (703) 308-2682.
